

CHARLES LINDBERGH ASSISTED BY ALIENS DURING HIS FLIGHT FROM NEW YORK TO PARIS!

Charles Lindbergh has become known as an American hero for his solo journey across the Atlantic Ocean in the *Spirit of St. Louis*. The *Thornton Tattler* recently had a chance to examine the famous plane and made a shocking discovery: alien technology hidden within the plane. It seems that Charles Lindbergh did not make a solo journey after all: he was aided by extra-terrestrials! The *Tattler's* scientists have thoroughly examined the plane determining that the technology aboard is certainly not of this earth. We understand that this story may be difficult to read for many of our subscribers but there is more evidence to back up this claim. You are all just as familiar with Lindbergh's flight as with the kidnapping and murder of his child. Evidently there is an alien connection between the two events. While making his 33 ½ hour flight aliens took Lindbergh and his plane on board and aided him in his journey across the Atlantic. In return for this help, Lindbergh promised the aliens access to his youngest son, Charles. The *Tattler* has learned that it was not Bruno Richard Hauptmann who took the Lindbergh baby but aliens! They had planned to run a series of tests on the baby boy but the experiments went horribly wrong. The aliens dumped the baby back on Earth. After Hauptmann was found guilty, the Lindbergh's moved to Europe to avoid further scrutiny about the event but, as always, the *Tattler* has discovered the truth!
